Duration	3 mins 14 secs
Grade	**13.00** out of 15.00 (**86.67**%)

Question **1**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

a. When the list is very small
b. When the list is unsorted
c. When the list contains duplicate elements
d. When the list is sorted ✓

Question **2**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Both (1) & (3)
b. Binary ✓
c. Linear
d. Hash

Question **3**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Both (1) & (3)
b. Linear search ✓
c. Binary search
d. Hash search

Question **4**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

- a. There must be a mechanism to delete and/or insert elements in the list ✓
- b. There should be direct access to the middle element in any sublist
- c. The list must be sorted
- d. Number values should only be present

Number values should only be present

Question **5**

Correct

Mark 1.00 out of 1.00

In binary search, how is the middle element determined?

- a. By comparing each element sequentially
- b. By dividing the list length by two ✓
- c. By starting from the first element
- d. By using a hash function

Question **6**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

- a. By sorting the list first
- b. By dividing the list into halves
- c. By using a hash function
- d. By comparing each element in the list sequentially ✓

Question **7**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Inserting elements into a list
b. Determining whether an element is present in a list ✓
c. Deleting elements from a list
d. Sorting elements in a list

Question **8**

Incorrect

Mark 0.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

a. 90 and 100
b. 89 and 94
c. 94 and 99 ✗
d. 90 and 99

Question **9**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

a. Binary search
b. Hash search
c. Interpolation search
d. Linear search ✓

Question **10**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Dividing the list in half repeatedly
b. Skipping every second element
c. Sorting the list before searching
d. Checking each element sequentially ✓

Question **11**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

a. Hashing
b. Dynamic search
c. Linear search ✓
d. Binary search

Question **12**

Incorrect

Mark 0.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

a. The higher middle element is chosen as the middle element
b. The middle element is chosen randomly
c. The search stops
d. The lower middle element is chosen as the middle element ✗

Question **13**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the left sublist
b. At the beginning of the list
c. In the middle of the list
d. In the right sublist ✓

Question **14**

Correct

Mark 1.00 out of 1.00

What is the first step in binary search?

a. Divide the list into two equal parts
b. Compare the target element with the middle element in the list ✓
c. Sort the list
d. Compare the target element with the first element in the list

Question **15**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the entire list
b. In the right sublist
c. At the beginning of the list
d. In the left sublist ✓
